NUMBER 24

## Thought Sweet Clover A Weed

When the flood of 1913 overflowed the fertile Walhonding river valleys in Coshocton County, Ohio, it brought to this section of the county, what was thought to be, a troublesome weed. The weed was sweet clover.

C. H. Miller of near Coshocton lost several thousand bushels of corn, practically his entire money crop, by the flood; it also smothered his wheat crop with a heavy layer of sand, and in this silt from farther up, came seed of sweet clover.

What seemed to be misfortune, proved later on to have been a godsend to Mr. Miller. He is now one of our leading corn growers and most of his success he attributes to this "troublesome weed."

The rotation followed is but a two-year one, of corn and wheat with clover sandwiched between. In the early spring he broadcasts sweet clover on the wheat ground and which by wheat cutting time has made a growth that greatly enhances the roughage feeding value for the steers which he winters. Fall pasturing prevents too rank a growth and the following May when the clover has attained a good height, it is plowed down for corn.

Quite a bit of test work has been carried on at the Miller farm with sweet clover and he finds it's principal value to be that as green manure. He has had some success with sowing clover in the corn at the last cultivation and using a continuous rotation of corn. Fall weather conditions make this uncertain he says.

"I would not do without sweet clover if it cost me \$25 per bushel," he says.

## Saves Tobacco

A testimonial to the economy of the automobile has been given by Tom Handson, who lives thirty miles from Marshall, Texas. "Ten years ago it would have required two days and a pound of chewing tobacco to make the trip to Marshall," says Handson. "But today I can make it in two hours and one chew."

# \$100<sup>00</sup> Worth of Nitrogen for Only \$1<sup>00</sup>

## Proven Results From Nod-o-gen Inoculation

If you want the greatest fertilizer bargain ever offered, and at the same time, want to ensure a better catch, a more vigorous growth, and a bigger crop, inoculate every bushel of Sweet Clover, Alfalfa, Soy Beans or other legume seed you sow this season with a vigorous, pure culture of root nodule bacteria.

Nod-o-gen is a scientifically prepared pure culture, put up on a special food jelly in patent stopper bottles. Easy to use and sure to produce results. You can see for yourself it contains live bacteria — we'll show you how.

Come in and get free leaflet showing how \$1.00 invested in the right kind of inoculation gives a hundred dollars return.

# NOD-O-GEN

The Right Kind of Inoculation

## You Can Show The Farmers Nod-o-gen Is Alive WILL HELP YOU SELL MORE INOCULATION

Hold a bottle of NOD-O-GEN in the light and look at the top of the jelly contents. You will see a wet-shiny, mucilaginous patch on top of the jelly. Some times there are cloudy strands running down from the under-surface of the patch through the jelly. This wet-shiny patch is alive and growing colony of root nodule bacteria. When you can see it, you positively know that NOD-O-GEN is alive and good. If the jelly shows a black mold or any discoloration, it is a sign that the culture has become contaminated, and the bottle will be replaced free of charge. This happens rarely for every NOD-O-GEN bottle is inspected before it leaves our laboratories and must be pure and vigorous.

You can show the growing bacteria colony to your farmer prospects. You can explain to them they take no chances with NOD-O-GEN. They do not have to buy "a pig in the poke". They know it is good before they buy it. Try this and see how much easier it is to sell NOD-O-GEN.

Cuts required for above advertisement furnished free. Order set Nos. 10 and 10-A

# "PINE TREE" BRAND SEEDS IN Sealed Bushel Bags

The modern way of handling seeds has these advantages:

1. Saves time and labor otherwise lost weighing bushel lots out of bulk sacks.
2. Saves loss of seed caused by spillage and giving "down weights." One pound of clover saved pays cost of bag.
3. Saves money on bags. How much loss does your bag account show every year?
4. Easier to handle and safer to ship on account of lighter and more convenient size package.
5. The farmer prefers it because he gets his seed in the original branded and sealed package.
6. The farmer's wife prefers it because she has many uses for the empty bags.

Order part or all of your requirements in sealed bushel bags for convenience and saving.
